

About 9 years ago I had to make an important decision. My daughter who was a Pre-k age was ready for school. The question was to find the best one. I was looking for a school with good traditions, quality of education and caring and knowledgeable teachers. After recommendation from her pediatrician, few of my friends and a deep internet research, decision was made - Bambi Academy. To give children a quality start and a solid foundation, will result in their successful academic future. I am so fortunate that my daughter had an opportunity like that. The level of education, the safe environment, wonderful and caring teachers of this establishment is simply superb. When it was my son's turn to go to school, we enrolled him to Bambi, without a second thought. He is a happy 4th grader, who looks forward going to school and dreaming that his room teacher Irina S. will go to college with him as well. Kids are very friendly to each other and helpful too. School has lots of great activities and you should see their Winter and Mothers Day recitals. Teachers put a lot of energy, time and effort so our children are happy there. I am very pleased with level of education my kids received in Bambi Academy. Special thanks to his math/room teacher Irina S. who is always there for them. Thanks to all the teachers for their efforts and warmth to our kids. My husband and I, are very proud and happy parents.
