Essay

Hi, my name is Alexis Lemberikman. I am currently in the top honor class of 6-A. Here, we learn advanced math, english, science, and much more. The program is very complex, but all my classmates and I are trying our best to achieve good grades. In my class, the teachers try to get us ready for the SHSAT exam, and to get us into a specialized high school such as Stuyvesant or Brooklyn Tech. So far, we are all doing great.

Besides academic studies, there is also the school itself. The teachers in Bambi Academy are very nice and are always willing to help you with something, even if they already explained 200 times already. Even the lunch staff is great! On Fridays, we get frozen yogurt with a topping of your choice! To make a long story short, if you are looking for a school for child, Bambi is the place to go!
