

## Big Apple Academy

By Matthew Severin

TB (Larise)

Hi, I am Matthew Severin and I have been attending Big Apple Academy for five years. In my opinion, this school is very educational. It is wonderful that most of the subjects in this school are taught at a higher level. Later on in life, it will be easier in high school because we already went over many high school topics. This school taught me to become more social to other kids. I now have friends, best friends, and even get along with teachers. This school is also a wonderful day-care center, an elementary school, a junior high school and soon to be a high school!!! That is just amazing.

What I definitely love about this school is that it makes me feel at home. From what I saw in public schools, this school brings a home environment. I love that and many other people do to. There are very kind teachers, classroom teachers and kids. I would recommend this school to anyone. These years have been the best in my school experiences. I grantee that anybody will feel welcome this school. I believe that this school can offer a lot and help you in your future life. "Bambi Academy" (where excellence becomes tradition) is a wonderful school!!!
