

Grade 6 → 7 Summer Homework Math Package

It is important that you keep practicing your mathematical Knowledge over the summer to be ready for **7th grade**. In this Package you will find a calendar of activities for the month of July and August.

What should you do?

- Take a new notebook for every-day practice. For each day you will need 2 pages;
- Start each day with vocabulary words: copy each word from the given day-list, find and write the meaning of each word in your notebook on the front page (pages 1,3,5, . . . and so on);
- Use the internet to find the meaning of each word you do not know:

www.amathsdictionaryforkids.com/dictionary.html

- Solve the problem of the day and write the solution with full explanation on the back page (pages 2,4,6,. . . and so on);
- Have the date of the entry. Have a clear and complete answer. Be neat and organize.

Do not forget to bring your notebook to school on September 1, 2016 - the first school day.

Have a Great Summer!!

August

6 → 7

Monday

Tuesday

Wednesday

Thursday 4

Friday 5

Saturday 6

**Incoming
7th Grade**

Find the measure of each interior and exterior angle of regular pentagon.

8

If the sum of the measure of a regular polygon is 1800° , how many sides does the polygon have?

9

Can sides lengths 3cm, 5cm, 11 cm be used to form a triangle? Write yes or no, explain.

10

List all possible quadrilaterals that have two pairs of adjacent sides that are congruent

11

Give examples of a perfect square that is also a perfect cube.

12

Determine whether a triangle with sides 4m, 5m, 6m is a right triangle.

13

**Summer
Home Work
for FUN**

Find the length of a diagonal of the rectangle whose length is 12 inches and width is 5 inches.

15

Write a rational number that is between $\frac{1}{4}$ and $\frac{1}{3}$.

16

What is the greatest common factor of 108, 81, 162, 216?

17

Express each ratio in simplest form.

8:4/5

18

Find the Better buy:
3 cans for \$4 or 4 cans for \$5.50.

19

Write two different proportions using this set of numbers \$1.80, \$1.20, 14, 21

20

What percent of 10 is $\frac{1}{5}$

22

An amount increased from 40 to 45. Find the Percent increase.

23

An antique car dealer made a profit of 15% on a car that cost \$60,000. For how much did he sell the car?

24

Find tip and total cost of \$65 dinner with 18% tip.

25

Under the late afternoon sun a lamppost cast a 30ft shadow. Nearby a 5ft tall person casts a shadow 15ft tall. What is the height of the lamp post?.

26

$(-72x^6y^3z^2) / (8x^5yz^2)$

27

Solve:
 $14 - 5(p+3) = -16$

29

Remove a number from the following set so the mean is 20:
25, 23, 12, 10, 20

30

Remove a number from the data set so the median is 12:
10, 6, 3, 13, 12, 4

31

Find the median, mean, mode, and range of the set -2, 6, 2, -4.

1

Draw a Venn Diagram to show the prime factors of 140 and 105, and their common factors.

2

Six friends go bowling, the scores of 5 bowlers are 102, 115, 96, 82, 98. The average score for the group is 95. What is the sixth bowler's score?

3
