

Margaret Barber GA

Bambi Academy is considered one of the best elementary and middle school in Brooklyn, New York. Its education is similar to the way people teach in the European countries. It has great teachers for math, english, science, social studies, and other subjects. It is a must in the school to learn the russian language, since it is spoken throughout many countries. Children in Bambi, have a chance ^{to get} into a specialized ^{class} in which they would be prepared for specialized high schools. If they aren't able to get into the class, they still will be prepared for regions. Bambi provides you with four regions unlike any other ~~highschool~~ high school. If you pass this regions in high school you can take the other ones and already ^{have} take college education in high school. Bambi Academy also thinks of your entertainment and physical education. Apart from having sport and swimming as a lesson, Bambi can take children to after school activities like gymnastics, tennis, basketball, etc. After the activities

children come back to school to do their homework and be free at home. Of course the break at homework is at four o'clock for snack (breakfast is served at 8am and lunch at 12:15 - 1:45pm).

At 5pm the school ends and buses take children to their homes in Brooklyn, ~~the~~ Queens, and Staten Island. Parents could also pick up their children from 1:45pm to 6pm.

Bambi Academy thinks about your future. It provides you with great education, but as for entertainment you can go to the park with your class or stay in school and play games. Teachers usually host different plays and performances.
