

Dennis Yaturin 6-A

My name is Dennis Yaturin. All my life (ever since pre-kindergarten), I have been taught at Bambi/Big Apple Academy. I am currently in the class of 6-A. During my life, I have met many wonderful teachers. They helped me learn to think pragmatically and logically.

The school of Big Apple Academy is one of the best middle schools around. Many prestigious minds have come out of it and gone to specialized high schools. The school's curriculum is one year ahead of regular programs. Sometimes teachers in our school even teach things two years ahead of regular programs. This can mean that some sixth graders from Big Apple Academy can know some things that even eighth graders from some other school doesn't.

Even though the teaching in our school is vigorous, I have managed to keep up well. All my life, I have been an excellent student. I don't recall ever seeing a "G" in my report card. In fact, I once managed to get a 99 for my term average in first grade. Also, over the years, I have participated in just about every Olympics I could, collecting numerous certificates and medals. Last year, I received a gold medal from the government for the English Language Arts Olympics.

The school of Bambi/Big Apple Academy has taught me many things. It is like my second home. I will probably remain in it until eighth grade.
