

Emily Feldman 7B  
(Larisa)

I have been a student at Bambi Academy for the past eight years. In these eight years I have had my series of ups and downs at this magnificent school. Ever since kindergarten this school has provided me and other students with many things including artistic classes like Music and Art, and educational classes like Math, Science, English, and Soc.st. The education level is one level higher than other schools particularly in mathematics. All these classes are equipped with highly trained intelligent teachers ready to help students at any sign of struggle.

In addition to all the fantastic educational qualities the school has, there are also the recreational activities like shows for holidays, school trips, after school programs, and of course Harry Potter week. The homeroom teachers and the music teachers work together with the students to create amazing shows for holidays like new years, and mother's day. A few times a year the school takes the students on trips to farms, museums, shows and more unique sites. The school has a series of optional after school programs such as basketball, gymnastics, tennis, Tae Kwando, chess, dance, and swimming. Last but not least Harry Potter week is the week of Halloween on which the eighth graders act out the role of prefects and grade the students on their behavior. The week ends in a huge dance for all grades and prizes for the winning classes.
