

Grade 7 → 8 Summer Homework Math Package

It is important that you keep practicing your mathematical Knowledge over the summer to be ready for **8th grade**. In this Package you will find a calendar of activities for the month of July and August.

What should you do?

- Take a new notebook for every-day practice. For each day you will need 2 pages;
- Start each day with vocabulary words: copy each word from the given day-list, find and write the meaning of each word in your notebook on the front page (pages 1,3,5, . . . and so on):

www.amathsdictionaryforkids.com/dictionary.html

- Use the internet to find the meaning of each word you do not know;
- Solve the problem of the day and write the solution with full explanation on the back page (pages 2,4,6,. . . and so on);
- Have the date of the entry. Have a clear and complete answer. Be neat and organize.
- Do not forget to bring your notebook to school on September 5, 2017 - the first school day.

Have a Great Summer!!

7 → 8							Incoming 8th Grade
Monday	Tuesday	Wednesday	Thursday	Friday	Saturday		
7	8	9	10	11	12	Summer Home Work for FUN	
By what percent is the price increase from \$4.50 to \$5.40?	Find the sum of the first 5 positive composite numbers.	Find the area of the circle if the sides of the rectangle inscribed into the circle are 3 and 4.					
If 3% of the number is 27, what is 37% of the same number?	What is the value of z, if z is an integer and $1 \leq 5 - 2z < 3$	Solve graphically the system of inequalities: $Y \leq -3x - 5$ $Y > 2x + 4$	Simplify: $(-3a^4b^6)^2 =$ $(-2m^6n^3)^2 =$	Ann drove 1 hr first 40 mi and the next 60 mile with the speed 30 mph. Find her average speed for the total trip.	2,5,6,6,8,11,16,18 Make a box-and-whisker plot for the given set. Find the inter-quartile range.		
Write the equation of the line AB, if AB is perpendicular to CD: $y = 5x - 2$ and $A(-5, 2)$.	Find the greatest common factor and the least common multiple of 735 and 294.	 $m \parallel n$; Find the measure of angle 2.	If I will try, I will do it on time. Write converse, inverse and contrapositive for the given statement. Make a truth table.	Bob tossed the fair coin and got 80 heads and 19 tails. What is his chance to get a head for the next toss?	If 2 and -3 are the roots of the equation $x^2 - ax + b = 0$, find a + b.		
Multiply $x^2 - x - 1$ by $x^2 - x + 1$.	What is the value: $2.87^2 - 7.13^2$	Solve algebraically: $x - 5y = 7$ $x + 2y = 2$	Solve for h: $3(h - 2) - 3(h + 1) = h$	Find the value: $ 2 - 11 - 4^2 + 3$	If c% of 420 is 63, what is c?		
 AC is a diameter Find $m\angle B$	-3, -1, 1, 3, 5, Find the 10 th term of the sequence.	How many four-digits numbers has at least 1 digit 4?	Find the numerical value of the square root out of 1%.				
28	29	30	31
