**Conquering New York State**

# Conquering New York State

The Big Apple Academy's Math Department is a proud participant in the annual National Math League. Every year, our students make us exceptionally proud by representing the school and competing with other students on the national level. This year is no exception! The team of our seventh graders outperformed all other participants placing our school in First Place in New York State. Our sixth and eighth graders won second and third place, respectively, leaving behind 73 top New York State schools. We applaud to all our champions and congratulate parents and teachers who made this significant victory possible!

*Big Apple Academic Highlights*

## Grade 8

- Anton Ginzburg
- Joseph Abramov
- Dina Jolia
- Julia Ashikhmin
- Ella Krechmer
- Ilona Lakusta
- Mark Kirman
- Steven Rakhmanchik

- Allen Vasilyev
- Nikita Safronov
- David Oke
- Azamat Kutlukov
- Nikita Arefiev

## Grade 6

- Edward Novodvorsky
- Joshua Shvartsman
- Lev Liakhovetskyi
- Daniel Potievsky
- Joel Iffraimoff

# Our Middle School Marvel: Pythagorean Pride

Our students have long become celebrities for their mathematical accomplishments far outside our school district. Mathematics has become a proud banner of the Big Apple Academy and the very heartbeat of its student body. When it comes to Math, our students don't merely light the stars; they create constellations of their own! We congratulate all the winners of the Math League and hope that these victories will turn into legacies that our students will proudly carry through their life. Today your names decorate the academic greatness of your first alma mater, the Big Apple Academy! Tomorrow your names will be displayed on the banners on the Ivy League colleges and universities, and in the nearest future, your triumphs will glorify our nation far beyond its borders. We all rise to give our students a loud round of applause!
