

Miss you!!

Greetings to everyone! My name is Katrin Shelkov (which most of the people in Bambi knew me as Katya or Kat). Being a part of the Big Apple Family for 10 years, has helped prepare me tremendously for the hard work the world will throw at me in my further years of learning and growing. Every single teacher has left an impact on my life that still remains with me up until this day. The way each and every single one of them pushed for me to be the very best and tackle down any problem or challenge that can be thrown my way. The variety of higher level classes offered through Big Apple Academy, has helped me advance a lot quicker in my further studies. Following to my highschool, Leon M. Goldstein, I was able to fill my schedule with mainly AP classes. These classes allowed me to get ahead and fill up a bunch of credits that I now use in college as a way to graduate early and pursue my studies in medical school. Being one of the thousands of students in Fordham University, has helped me realize how much I took my Bambi days for granted. No one will ever care for your success as much as the teachers working at this school. I am forever grateful for all those who taught me every step of the way no matter how difficult I might have made it, for seeing my potential, for believing that I can achieve great things, and pushing me to become the person I am today!
