## Preventing Cyberbullying

Big Apple Academy

According to recent research, nearly 42% of kids have been bullied online, and almost one in four have had it happen more than once. Nine out of 10 middle school students have had their feelings hurt online. Therefore, it is important to talk to students and explain the possible dangers of bullying and cyberbullying.

**At the Big Apple Academy, we advocate for addressing the subject of cyberbullying both within the educational setting and within the home environment. This approach is critical in fostering a secure atmosphere for our children. Giving our existence in digital era, it is imperative that our students acquire the skills to navigate the online world.**
